

## two-minute monsters

### what you need:

assorted brain noodles®  
wiggle eyes  
assorted feathers  
assorted pom-poms  
glue dots®, tacky glue®  
or hot glue

### note:

glue dots® make adding things like wiggle eyes to furry guys super simple, especially, when your own little monsters are pitching in.

### how to make:

1. take mini m&m's containers and wrap one brain noodle around a few times.
2. use excess noodle to twist and create a face for your monster.
3. glue wiggle eyes (we especially love the creativity street® painted wiggle eyes)
4. add character by accessorizing your monster with pom-poms, feathers and chenille stems.
