

print a potato plate

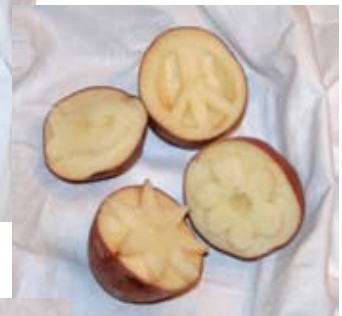

what you need:

- pebeo® porcelaine 150 paint
- potatoes
- large knife
- paring knife
- paint brush
- any store-bought white ceramic/stoneware dinner plate

how to make:

1. using your large knife cut potato in half making sure that surface of potato is perfectly flat.
2. carve your design into the potato using a paring knife. your design should be the raised part of the potato.
3. dry potato stamp with a paper towel. apply pebeo paint to raised portion of potato using a paint brush.
4. stamp onto plate, let colors dry for 15 minutes in-between and overlap with another color stamp. repeat until your plate is a masterpiece.
5. let plate dry for 24 hours. then place in a 325° oven and bake for 35 minutes. when cool, wash plate and eat dinner on your new plate. it is dishwasher safe!
